

FIBER OPTIC TOOLS & CONSUMABLES

FIBER OPTIC TOOLS

[A-C] Thread-Lock® Versa-Cleave® Tool: Diamond blade cleaves fiber perfectly every time, eliminating the need for a craft sensitive scribe procedure. The ergonomic stop-watch design fits comfortably in the hand, works with any style or brand of mechanical 2.5mm ferrule connector, and cleaves with a simple push of the button. The integrated debris cup catches and retains fiber debris for safe disposal. Two adapters, available separately, work with MT-RJ Workstation and Frame-Station connectors. Versa-Cleave can be ordered separately, or as part of either the Opt-X® Pro Tool Kit or the MT-RJ Tool Kit.

[D] Safety Pad: Provides a flexible, shatterproof, non-slip surface perfect for terminating all Leviton Fiber Optic Connectors.

[E, F] 100x and 200x Inspection Scopes: View multimode and single-mode end-face polishes safely, and reduce the chances of over-polishing (a side-effect of many coaxial inspection scopes). 200x Scope features oblique viewing technology, ergonomic grip, 200X magnification and full laser eye protection through wavelengths of 850-1550 nanometer. Both scopes feature rugged construction that stands up to jobsite abuse.

THREAD-LOCK VERSA-CLEAVE	
DESCRIPTION	PART NO.
[A] Versa-Cleave Tool	49886-TVC
[B] Versa-Cleave Adapter for MT-RJ Workstation Connector	49886-VWA
[C] Versa-Cleave Adapter for MT-RJ Frame-Station Connector	49886-VFA
SAFETY PAD	
[D] Safety Pad	49886-SPD
INSPECTION SCOPES	
[E] 100x Inspection Scope	49886-SCP
[F] 200x Inspection Scope	49886-FSP
