

**ORDERING INFORMATION**

Hex head Tapper anchors are measured from below the washer while flat head Tapper anchors are measured end to end. To select the proper minimum anchor length, determine the embedment depth required to obtain the desired load capacity. Then add the thickness of the fixture, including any spacers or shims, to the embedment depth.

**Do not select a length that will result in an embedment into the base material which is greater than 1 3/4" to 2".**

**Most concrete screw anchors cannot be properly driven to a depth of more than 2", especially in denser base materials.**

**Blue Perma-Seal Tapper, Slotted Hex Head & Flat Head**
